Start here for a world of discovery.

At ProQuest, we are dedicated to providing indispensable research solutions that connect people with information. As an innovator in archiving and disseminating information, we continually deliver data in effective and meaningful ways. We are particularly proud of our ability to provide rich, truly useful content for specific areas of study. Our imprint UMI Dissertation Publishing enables us to preserve and make discoverable the graduate works so important to the advancement of research around the world.

Especially for Authors

New "Milestone" editions replicate Library of Congress holdings for personal libraries

An Author's Graduate Work: the Cornerstone of a Career...

Note: Dissertations received in electronic format containing color are printed in color. Manuscripts received on paper and/or reproduced from microfilm are printed in black and white.

More than marking the distinction of earning a graduate degree, a published thesis or dissertation can serve as a personal springboard for a lifetime of contribution to the scholarly record. While electronic publishing facilitates wider discovery of research, authors deserve access to printed copies that reflect the same care they put into the work itself.

Bright white paper stock and long-lasting library bindings have been the hallmark of author copies from ProQuest's UMI Dissertation Publishing. Now, the UMI author copy print program includes the following enhancements:

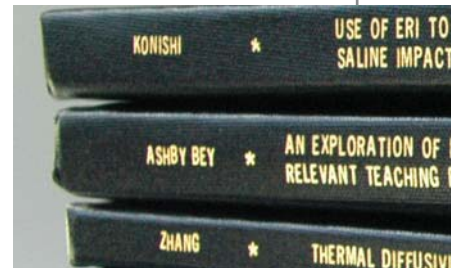

- ▶ Paper stock has been increased from 20-lb to 32-lb weight, which is a substantial improvement in "feel" as well as being more opaque. In addition to the acid-free archival grade, this photographic quality stock is a brighter white for best ink contrast and better readability.
- ▶ Any color graphics included in the digital copy of the thesis or dissertation received by UMI can now be reproduced in color. Photographs, charts, and other illustrations using color are now printed as faithfully as they were provided electronically.

These hardbound copies are 8-1/2"x11" with distinguished black covers made from 2.5mm-thick board covered in washable library buckram for durability. Titles are embossed in gold foil on the spine. Conforming to norms set by the Library Binding Institute for Class A Library Binding, our author copies feature handmade thread sewn bindings and generous margins for opening flat while reading. It's the manufacturing quality that evokes rare-book publishing, and a volume to last a lifetime.

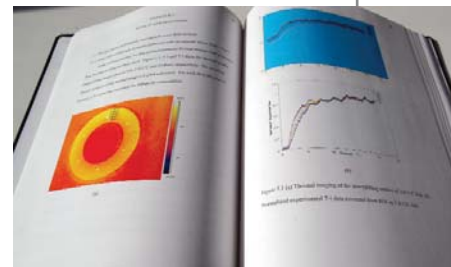

Best of all, this "Milestone" edition is the same version of graduate works as held in the collection of the Library of Congress. Authors can now own official replications with peerless quality reproduction from the nation's publisher of record, UMI Dissertation Publishing. Rendered with respect for the scholarly research inside, these volumes make treasured possessions for family, advisors, mentors and friends.

It's What's Inside that Counts...

Upgraded paper stock and the addition of color printing provide authors with matchless quality reproduction in the dissertation copies ordered from the nation's publisher of record, UMI Dissertation Publishing.

- ▶ New "Milestone" edition dissertations and these are produced with heavy weight, preservation-grade paper and elegant, sturdy hard covers

- ▶ Any color graphics or components are crisply and accurately reproduced

- ▶ Own the exact replicate of the graduate work held by the Library of Congress

- ▶ For home or office libraries... for treasured gifts
