

UMI Newspaper Microfilming Services

Fulfill your obligation to make sure that the full-text, full-image information in your newspaper will be available for generations to come. UMI Newspaper Microfilming Services preserves your publication's place in history in an easily accessible, archived, durable, and cost-efficient microfilm format. You can preserve your shelf space, save storage fees, provide a critical resource for your newsroom, and support:

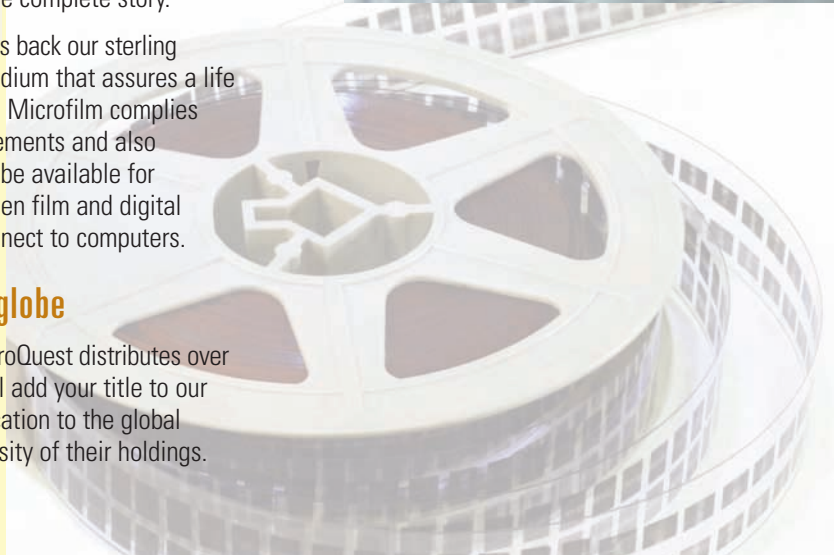

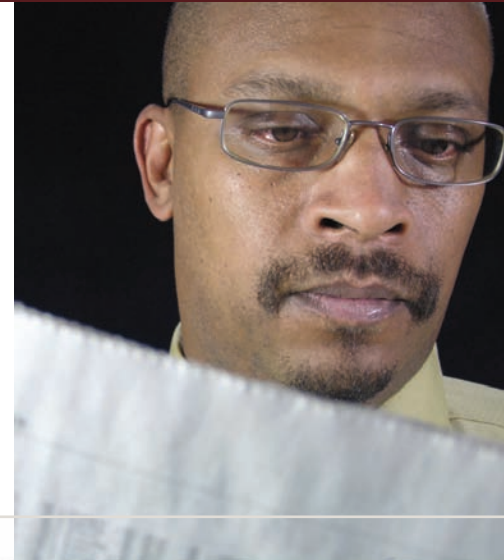

- Genealogists researching family members
- Local historians seeking to uncover the hidden assets of your town's history
- Students and researchers looking to explore new areas of research

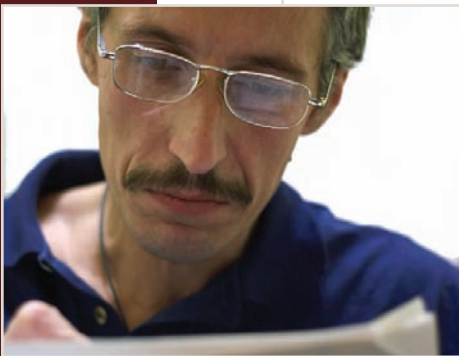

Your newspaper in microform gives readers and researchers today and tomorrow the benefits of complete full-page reproductions of the original documents, conveying information in the context that helps tell the complete story.

More than 1,000 customers and 1.2 billion page images back our sterling reputation for service in the time-tested microfilm medium that assures a life of at least 500 years under proper storage conditions. Microfilm complies with Library of Congress copyright registration requirements and also supports the first step in making sure your paper will be available for digitization. Plus, today you can bridge the gap between film and digital worlds with new microform scanner/viewers that connect to computers.

Hometown history reaching around the globe

Through our UMI Newspapers in Microfilm program, ProQuest distributes over 7,000 newspapers to libraries around the world. We'll add your title to our program and bring the unique viewpoint of your publication to the global libraries that rely on our content to enhance the diversity of their holdings.

Trust your priceless past to our vast experience and superior service

The leader in microfilming services for nearly 70 years, UMI archives each publication with the exacting care it deserves, with pricing to fit even the smallest publisher's budget.

You can preserve your newspaper in a variety of options – as published, in selected sections, a backfile, or a backfile with continuing run. We'll send you shipping cartons, expertly trim your papers, rearrange sections in their proper order, and even iron them to ensure the best image possible – all at no cost to you. You'll find we merit our renown for the highest quality product and most responsive service as we:

- Film your title to industry ANSI/AIIM standards using experienced microfilming technicians
- Continuously inspect your film for high quality throughout the process

- Store your master negatives in secure, climate-controlled vaults for safekeeping and preservation purposes at no extra charge. If you experience fire, flood, hurricane, or other natural disasters, we can quickly reproduce your backfile
- Provide a reference copy of the film for use in your offices (additional copies available at a small fee)

Thinking of making the transition from your current microfilming service to ours? Simply notify your current vendor you're switching and our seamless service and support staff will:

- Arrange transfer of your masters to secure, climate-controlled vaults
- Cover shipping costs at no charge to you
- Save your entire backfile in one reliable location

Preserve your title's place in history
